

*Please understand key indicators & functions at the first operation.

FRONT PANEL & KEY FUNCTIONS

Key Name	Symbol	Descriptions
Enter Key & Save Key	ENT	1. In the measuring status, press this key can enter to parameter pages. 2. In the parameter setting, press this key can save the value & go to next parameter.
Shift Key	◀	1. In the parameter setting, press this key can move the cursor left.
Up Key & Display Scaling Adjusting Key	↑	1. In the measuring status, press this key for 3 sec can enter to display scaling adjustment. 2. In the parameter setting, press this key can increase the digits.
Down Key & A/O Adjusting Key	↓	1. In the measuring status, press this key for 3 sec can enter to analog output adjustment. 2. In the parameter setting, press this key can decrease the digits.

- **1. The following block charts are parameters codes, parameter codes & parameters will alternate flashing if the parameters can be modified.
 2. To modify the parameters, please press $\leftarrow\uparrow\downarrow$, and press ENT to save the parameters after the modification.
 3. Please don't forget the new pass code after modification.
 4. In any pages, press \uparrow & \downarrow , or don't press any keys for 2 minutes that will back to measuring status.
 5. Scaling Formula:
 Frequency Display = (Scale x Input Frequency)/PPR
 RPM Display = (Scale x Input Frequency x 60)/PPR
 Line-Speed Display = [Scale x Input RPM x 3.1416 (π)]

GENERAL MODE OPERATING PROCEDURES

Block Charts	Display	Descriptions	Default
		Scaling Adjustment Present value for measurement.	
	Scale Coefficient Adjustment (SCALE)	Press $\leftarrow\uparrow\downarrow$ to modify scale coefficient 1 (0.0001 ~9.9999). PS: 1. In Frequency & RPM types, this coefficient can be modified for display value. (Please refer to Scaling Formula) 2. In Line-Speed type, this coefficient means "diameter" of the roll, the unit will be changed by selecting display unit. EX: If the display unit is "Meter", the diameter is also showed "Meter".	10000
		Analog Output: "ZERO" & "SPAN" Adjustment Present value for measurement.	
	A/O Zero Adjustment (AZEro)	Press \leftarrow to select adjusting speed rate, press $\uparrow\downarrow$ to modify the A/O zero. PS: To use this function to adjust the real A/O zero.	00000
	A/O Span Adjustment (ASPAn)	Press \leftarrow to select adjusting speed rate, press $\uparrow\downarrow$ to modify the A/O span. PS: To use this function to adjust the real A/O span.	00000

PROGRAMMING MODE OPERATING PROCEDURES

Block Charts	Display	Descriptions	Default
	Measuring Status	Present value for measurement.	
	Pass Code (P.Cod)	Press $\triangle \square \nabla$ to enter pass code. Pass code is correct that will enter to parameter groups. Pass code is wrong that will back to measuring status.	00000
	Decimal Point Setting (dP)	Press $\triangle \square \nabla$ to select decimal point (0, 1, 2, 3, 4) EX: if the value shows "0.00" that means the decimal point is 2 digits.	0
	Input Type Setting (tYPE)	Press $\triangle \square \nabla$ to modify the input type (RPM/Line-Speed/Frequency).	Customers specify
		The following steps are only available for Line-Speed type.	
	Line-Speed Unit Setting (Unit)	Press $\triangle \square \nabla$ to modify the unit of line-speed (Meter/Foot/Yard).	Customers specify
	PPR Setting (PPr)	Press $\triangle \square \nabla$ to modify ppr (1~99999).	0000 1
	Sampling Time Base (tbASE)	Press $\triangle \square \nabla$ to modify sampling time base (0.1~999.9 sec).	0000.1
	Display Average Setting (AvG)	Press $\triangle \square \nabla$ to modify display average (1~99). PS: Please use this function for stable display value when input signal is unstable.	00005
	A/O Polarity Setting (PoLAr)	Press $\triangle \square \nabla$ to select output for positive or negative pole. PS : Voltage output ,NO: positive pole output (0~+10V) YES: positive & negative pole output (-10~-+10V)	no
	A/O Low Scale Setting (AnLo)	Press $\triangle \square \nabla$ to adjust A/O low scale to correspond to the display value. EX : A/O is 0~10V, the display is 10.0 to output 0V, this value must be set for 10.0.	00000
	A/O Hi Scale Setting (AnHi)	Press $\triangle \square \nabla$ to adjust A/O hi scale to correspond to the display value. EX : A/O is 0~10V, the display is 90.0 to output 10V, this value must be set for 90.0.	99999
	Pass Code Setting (CodE)	Press $\triangle \square \nabla$ to modify pass code (0~19999). PS: Please don't forget the new pass code after modification.	00000
	Key Lock Setting (LoCK)	Press $\triangle \square \nabla$ to lock the keys, using key lock function only can view the parameters, but cannot modify any values.	no

Error Code of Self-Diagnosis

Display	Descriptions
1_oFL	Input signal is over input range (0~100KHz).
doFL	Input signal is over display range (99999).
E-00	EEPROM reading/writing suffers the interference (about 1 million times).

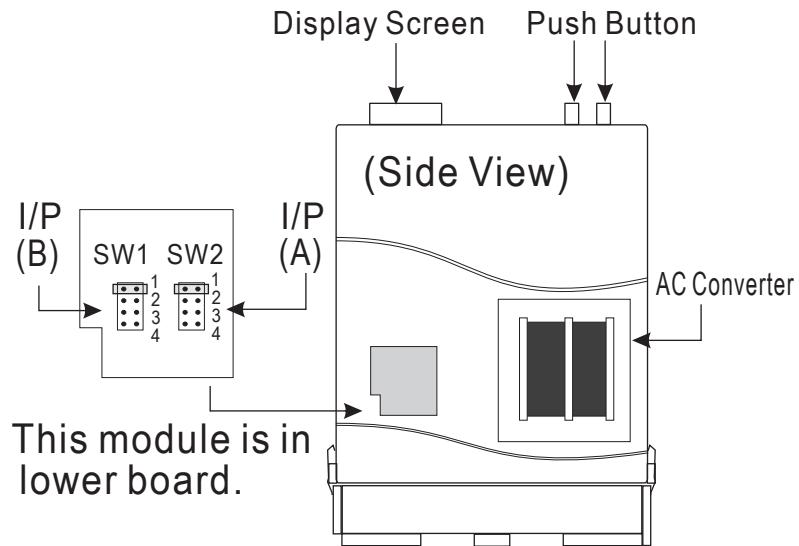

**Please check the wiring connection is correct first, if the problem still exist, please return the meter to the factory.

Frequency Input Signal Modification

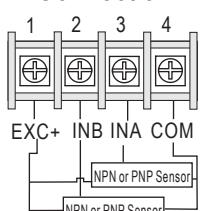

**To Select the pin to modify the input signal for different sensors.

PS: In dual input type, excitation power must be the same.
