

* Please understand key indicators & functions at the first operation.

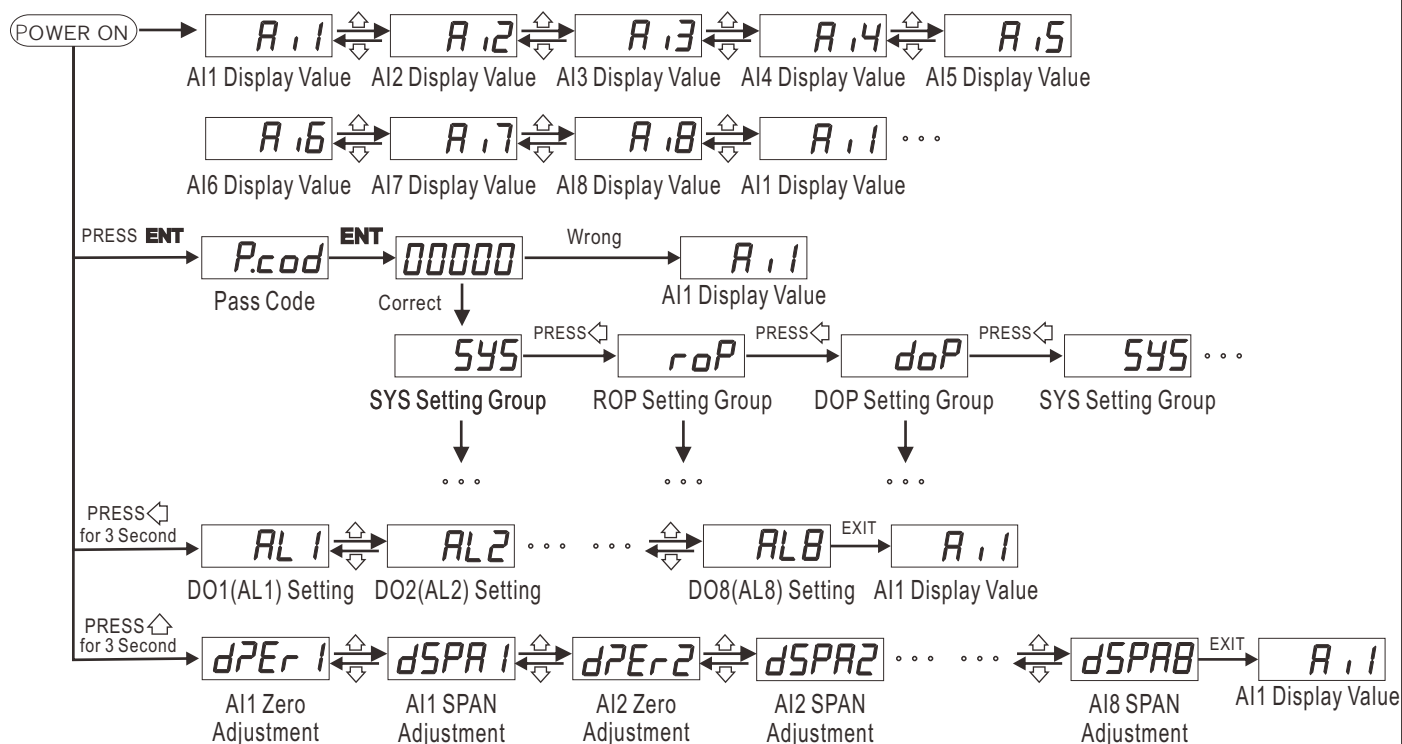

FRONT VIEW & KEY FUNCTIONS

Key Name	Symbol	Descriptions
Enter Key & Save Key	ENT	1. In the measuring status, press this key can enter to parameter pages. 2. In the parameter setting, press this key can save the value & go to next parameter.
Shift Key & DO Setting Key	←	1. In the measuring status, press this key for 3 sec can enter to DO setting page. 2. In the parameter setting page, press this key can move the cursor to left digit.
Up Key & Display Value Adjusting Key	↑	1. In the measuring status, press this key for 3 sec can enter to display value adjustment of "ZERO" & "SPAN" 2. In the parameter setting page, press this key can jump to next parameter. 3. In the parameter setting mode, press this key can increase the digits.
Down Key	↓	1. In the parameter setting page, press this key can jump to previous parameter. 2. In the parameter setting, press this key can decrease the digits.
Exit Key	↑ + ↓	1. In the any page, press this key can exit to measuring status.

★ In the setting page, the parameter name and value will be displayed alternately, and press the ← key to enter setting mode.

DISPLAY SCREEN AND SETTING FLOW CHART

**1. The following block charts are parameters codes, parameter codes & parameters will alternate flashing if the parameters can be modified.

2. To modify the parameters, please press \triangleleft / \triangleup / \triangledown , and press ENT to save the parameter after the modification.

Display Value: "ZERO" & "SPAN" Adjustment			
<div style="border: 1px solid black; padding: 5px; margin-bottom: 5px;"> Block Charts Power ON ↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">10000</div> Press \triangleleft for 3 sec ↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dZE r 1</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dSPA 1</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dZE r 2</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dSPA 2</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dZE r 3</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dSPA 3</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dZE r 4</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dSPA 4</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dZE r 5</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dSPA 5</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dZE r 6</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dSPA 6</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dZE r 7</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dSPA 7</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dZE r 8</div> ↑/↓ <div style="border: 1px solid black; padding: 2px; text-align: center; font-weight: bold;">dSPA 8</div> ENT </div>	Measuring Status AI1 Zero Adjustment (dZE r1) AI1 Span Adjustment (dSPA1) AI2 Zero Adjustment (dZE r2) AI2 Span Adjustment (dSPA2) AI3 Zero Adjustment (dZE r3) AI3 Span Adjustment (dSPA3) AI4 Zero Adjustment (dZE r4) AI4 Span Adjustment (dSPA4) AI5 Zero Adjustment (dZE r5) AI5 Span Adjustment (dSPA5) AI6 Zero Adjustment (dZE r6) AI6 Span Adjustment (dSPA6) AI7 Zero Adjustment (dZE r7) AI7 Span Adjustment (dSPA7) AI8 Zero Adjustment (dZE r8) AI8 Span Adjustment (dSPA8)	Present value for measurement. Zero Adjustment(dZE r) setting is modify the display vale to correct value, when the value have a slight deviation of the zero point, please adjust this setting. PS. When enter to the dZE r setting mode, you will see the last digit of current value flashing, then please press UP or DN key to adjust it to the correct value, if the value of change is too small or no changing, you can press SHIFT key to move to higher digit then modify again. Span Adjustment(dSPA) setting is modify the display vale to correct value, when the value have a slight deviation of the span point, please adjust this setting. PS. When enter to the dSPA setting mode, you will see the last digit of current value flashing, then please press UP or DN key to adjust it to the correct value, if the value of change is too small or no changing, you can press SHIFT key to move to higher digit then modify again.	 Same as current input value

ADVANCED SETTING PROCEDURES

Block Charts	Display	Descriptions	Default
System Setting Group Procedures			
	Measuring Status	Present value for measurement.	
	System Setting Page (SYS)		
Power ON ↓ 10000 Press ENT ↓ 545 Press ENT ↓ dP1	A11 Decimal Point Setting (dP1)	Select the decimal point of A11, setting range: 0, 1, 2, 3, 4 EX. If need the value showing "0.00", set the dP to "2."	Customers specify
↑/↓ ↓ dSPL1	A11 Low Scale Setting (dSPL1)	Setting the display low scale of A11, this value is the display value of the minimum input. EX. If the input signal is 4~20mA, and need to display 0.0 of 4mA, set the dSPL to 0000.0	
↑/↓ ↓ dSPH1	A11 High Scale Setting (dSPH1)	Setting the display high scale of A11, this value is the display value of the maximum input. EX. If the input signal is 4~20mA, and need to display 100.0 of 20mA, set the dSPL to 100.0	
↑/↓ ↓ dP2	A12 Decimal Point Setting (dP2)	Select the decimal point of A12, setting range: 0, 1, 2, 3, 4 EX. If need the value showing "0.00", set the dP to "2."	
↑/↓ ↓ dSPL2	A12 Low Scale Setting (dSPL2)	Setting the display low scale of A12, this value is the display value of the minimum input. EX. If the input signal is 4~20mA, and need to display 0.0 of 4mA, set the dSPL to 0000.0	
↑/↓ ↓ dSPH2	A12 High Scale Setting (dSPH2)	Setting the display high scale of A12, this value is the display value of the maximum input. EX. If the input signal is 4~20mA, and need to display 100.0 of 20mA, set the dSPL to 100.0	
↑/↓ ↓ dP3	A13 Decimal Point Setting (dP3)	Select the decimal point of A13, setting range: 0, 1, 2, 3, 4 EX. If need the value showing "0.00", set the dP to "2."	
↑/↓ ↓ dSPL3	A13 Low Scale Setting (dSPL3)	Setting the display low scale of A13, this value is the display value of the minimum input. EX. If the input signal is 4~20mA, and need to display 0.0 of 4mA, set the dSPL to 0000.0	
↑/↓ ↓ dSPH3	A13 High Scale Setting (dSPH3)	Setting the display high scale of A13, this value is the display value of the maximum input. EX. If the input signal is 4~20mA, and need to display 100.0 of 20mA, set the dSPL to 100.0	
↑/↓ ↓ dP4	A14 Decimal Point Setting (dP4)	Select the decimal point of A14, setting range: 0, 1, 2, 3, 4 EX. If need the value showing "0.00", set the dP to "2."	
↑/↓ ↓ dSPL4	A14 Low Scale Setting (dSPL4)	Setting the display low scale of A14, this value is the display value of the minimum input. EX. If the input signal is 4~20mA, and need to display 0.0 of 4mA, set the dSPL to 0000.0	
↑/↓ ↓ dSPH4	A14 High Scale Setting (dSPH4)	Setting the display high scale of A14, this value is the display value of the maximum input. EX. If the input signal is 4~20mA, and need to display 100.0 of 20mA, set the dSPL to 100.0	
↑/↓ ↓ dP5	A15 Decimal Point Setting (dP5)	Select the decimal point of A15, setting range: 0, 1, 2, 3, 4 EX. If need the value showing "0.00", set the dP to "2."	
↑/↓ ↓ dSPL5	A15 Low Scale Setting (dSPL5)	Setting the display low scale of A15, this value is the display value of the minimum input. EX. If the input signal is 4~20mA, and need to display 0.0 of 4mA, set the dSPL to 0000.0	
↑/↓ ↓ dSPH5	A15 High Scale Setting (dSPH5)	Setting the display high scale of A15, this value is the display value of the maximum input. EX. If the input signal is 4~20mA, and need to display 100.0 of 20mA, set the dSPL to 100.0	
↑/↓ ↓ dP6	A16 Decimal Point Setting (dP6)	Select the decimal point of A16, setting range: 0, 1, 2, 3, 4 EX. If need the value showing "0.00", set the dP to "2."	
↑/↓ ↓ dSPL6	A16 Low Scale Setting (dSPL6)	Setting the display low scale of A16, this value is the display value of the minimum input. EX. If the input signal is 4~20mA, and need to display 0.0 of 4mA, set the dSPL to 0000.0	
↑/↓ ↓ dSPH6	A16 High Scale Setting (dSPH6)	Setting the display high scale of A16, this value is the display value of the maximum input. EX. If the input signal is 4~20mA, and need to display 100.0 of 20mA, set the dSPL to 100.0	
↑/↓ ↓ dP7	A17 Decimal Point Setting (dP7)	Select the decimal point of A17, setting range: 0, 1, 2, 3, 4 EX. If need the value showing "0.00", set the dP to "2."	
↑/↓ ↓ dSPL7	A17 Low Scale Setting (dSPL7)	Setting the display low scale of A17, this value is the display value of the minimum input. EX. If the input signal is 4~20mA, and need to display 0.0 of 4mA, set the dSPL to 0000.0	
↑/↓ ↓ dSPH7	A17 High Scale Setting (dSPH7)	Setting the display high scale of A17, this value is the display value of the maximum input. EX. If the input signal is 4~20mA, and need to display 100.0 of 20mA, set the dSPL to 100.0	
↑/↓ ↓ dP8	A18 Decimal Point Setting (dP8)	Select the decimal point of A18, setting range: 0, 1, 2, 3, 4 EX. If need the value showing "0.00", set the dP to "2."	
↑/↓ ↓ dSPL8	A18 Low Scale Setting (dSPL8)	Setting the display low scale of A18, this value is the display value of the minimum input. EX. If the input signal is 4~20mA, and need to display 0.0 of 4mA, set the dSPL to 0000.0	
↑/↓ ↓ dSPH8	A18 High Scale Setting (dSPH8)	Setting the display high scale of A18, this value is the display value of the maximum input. EX. If the input signal is 4~20mA, and need to display 100.0 of 20mA, set the dSPL to 100.0	
↑/↓ ↓ AvG	Display Average Setting (AvG)	Setting the display value average count, setting range: 1~99 EX. If the input signal is 4~20mA, and need to display 0.0 of 4mA, set the dSPL to 0000.0	00005
↑/↓ ↓ LCUt	Display Low Cut Setting (LCUt)	Setting the display low cut value, setting range: 0~99 If the display value lower than this setting, and it will display 0.	00000
↑/↓ ↓ LoCk	Key Lock Setting (LoCk)	Setting the key lock function, when setting yes, the key will be locked in the setting page.	no
↑/↓ ↓ CodE	Pass Code Setting (CodE)	Setting the pass code, setting range: 0~19999 Please	00000

DO (ALARM) SETTING PROCEDURES

Block Charts	Display	Descriptions	Default
ROP Setting Group Procedures			
Power ON ↓ 10000	Measuring Status	Present value for measurement.	
Press ENT ↓ 545	System Setting Group (SYS)		
Press ← ↓ rop	DO Setting Group (roP)		
Press ENT ↓ dSEL1	DO1 Selection Setting (dSEL1)	Select the reference of DO1, setting range: AI1, AI2...AI8, RS485 If set to RS485, the DO is controlled by RS485 communication, other ROP setting is disabled	r5485
↑/↓ ↓ Act1	DO1 Alarm Action Direction Setting (ACT1)	Setting the alarm output action direction, setting range: Hi, Lo Hi is for high alarm(≥) and Lo is for low alarm(<).	Hi
↑/↓ ↓ HYS1	DO1 Alarm Hysteresis Setting (HyS1)	Setting the alarm hysteresis value, setting range: 0~9999 Turn off the alarm after the display value cross over the alarm point and this setting value.	00000
↑/↓ ↓ dEL1	DO1 Alarm Delay Time Setting (dEL1)	Setting the alarm action delay time, setting range: 0~99 (sec) Turn on the alarm after the display value cross over the alarm point and this setting time.	00000
↑/↓ ↓ dSEL2	DO2 Selection Setting (dSEL2)	Select the reference of DO2, setting range: AI1, AI2...AI8, RS485 If set to RS485, the DO is controlled by RS485 communication, other ROP setting is disabled	r5485
↑/↓ ↓ Act2	DO2 Alarm Action Direction Setting (ACT2)	Setting the alarm output action direction, setting range: Hi, Lo Hi is for high alarm(≥) and Lo is for low alarm(<).	Hi
↑/↓ ↓ HYS2	DO2 Alarm Hysteresis Setting (HyS2)	Setting the alarm hysteresis value, setting range: 0~9999 Turn off the alarm after the display value cross over the alarm point and this setting value.	00000
↑/↓ ↓ dEL2	DO2 Alarm Delay Time Setting (dEL2)	Setting the alarm action delay time, setting range: 0~99 (sec) Turn on the alarm after the display value cross over the alarm point and this setting time.	00000
↑/↓ ↓ dSEL3	DO3 Selection Setting (dSEL3)	Select the reference of DO3, setting range: AI1, AI2...AI8, RS485 If set to RS485, the DO is controlled by RS485 communication, other ROP setting is disabled	r5485
↑/↓ ↓ Act3	DO3 Alarm Action Direction Setting (ACT3)	Setting the alarm output action direction, setting range: Hi, Lo Hi is for high alarm(≥) and Lo is for low alarm(<).	Hi
↑/↓ ↓ HYS3	DO3 Alarm Hysteresis Setting (HyS3)	Setting the alarm hysteresis value, setting range: 0~9999 Turn off the alarm after the display value cross over the alarm point and this setting value.	00000
↑/↓ ↓ dEL3	DO3 Alarm Delay Time Setting (dEL3)	Setting the alarm action delay time, setting range: 0~99 (sec) Turn on the alarm after the display value cross over the alarm point and this setting time.	00000
↑/↓ ↓ dSEL4	DO4 Selection Setting (dSEL4)	Select the reference of DO4, setting range: AI1, AI2...AI8, RS485 If set to RS485, the DO is controlled by RS485 communication, other ROP setting is disabled	r5485
↑/↓ ↓ Act4	DO4 Alarm Action Direction Setting (ACT4)	Setting the alarm output action direction, setting range: Hi, Lo Hi is for high alarm(≥) and Lo is for low alarm(<).	Hi
↑/↓ ↓ HYS4	DO4 Alarm Hysteresis Setting (HyS4)	Setting the alarm hysteresis value, setting range: 0~9999 Turn off the alarm after the display value cross over the alarm point and this setting value.	00000
↑/↓ ↓ dEL4	DO4 Alarm Delay Time Setting (dEL4)	Setting the alarm action delay time, setting range: 0~99 (sec) Turn on the alarm after the display value cross over the alarm point and this setting time.	00000
↑/↓ ↓ dSEL5	DO5 Selection Setting (dSEL5)	Select the reference of DO5, setting range: AI1, AI2...AI8, RS485 If set to RS485, the DO is controlled by RS485 communication, other ROP setting is disabled	r5485
↑/↓ ↓ Act5	DO5 Alarm Action Direction Setting (ACT5)	Setting the alarm output action direction, setting range: Hi, Lo Hi is for high alarm(≥) and Lo is for low alarm(<).	Hi
↑/↓ ↓ HYS5	DO5 Alarm Hysteresis Setting (HyS5)	Setting the alarm hysteresis value, setting range: 0~9999 Turn off the alarm after the display value cross over the alarm point and this setting value.	00000
↑/↓ ↓ dEL5	DO5 Alarm Delay Time Setting (dEL5)	Setting the alarm action delay time, setting range: 0~99 (sec) Turn on the alarm after the display value cross over the alarm point and this setting time.	00000
↑/↓ ↓ dSEL6	DO6 Selection Setting (dSEL6)	Select the reference of DO6, setting range: AI1, AI2...AI8, RS485 If set to RS485, the DO is controlled by RS485 communication, other ROP setting is disabled	r5485
↑/↓ ↓ Act6	DO6 Alarm Action Direction Setting (ACT6)	Setting the alarm output action direction, setting range: Hi, Lo Hi is for high alarm(≥) and Lo is for low alarm(<).	Hi
↑/↓ ↓ HYS6	DO6 Alarm Hysteresis Setting (HyS6)	Setting the alarm hysteresis value, setting range: 0~9999 Turn off the alarm after the display value cross over the alarm point and this setting value.	00000
↑/↓ ↓ dEL6	DO6 Alarm Delay Time Setting (dEL6)	Setting the alarm action delay time, setting range: 0~99 (sec) Turn on the alarm after the display value cross over the alarm point and this setting time.	00000
↑/↓ ↓ dSEL7	DO7 Selection Setting (dSEL7)	Select the reference of DO7, setting range: AI1, AI2...AI8, RS485 If set to RS485, the DO is controlled by RS485 communication, other ROP setting is disabled	r5485
↑/↓ ↓ Act7	DO7 Alarm Action Direction Setting (ACT7)	Setting the alarm output action direction, setting range: Hi, Lo Hi is for high alarm(≥) and Lo is for low alarm(<).	Hi
↑/↓ ↓ HYS7	DO7 Alarm Hysteresis Setting (HyS7)	Setting the alarm hysteresis value, setting range: 0~9999 Turn off the alarm after the display value cross over the alarm point and this setting value.	00000
↑/↓ ↓ dEL7	DO7 Alarm Delay Time Setting (dEL7)	Setting the alarm action delay time, setting range: 0~99 (sec) Turn on the alarm after the display value cross over the alarm point and this setting time.	00000

	Display	Descriptions	Default
	DO8 Selection Setting (dSEL8)	Select the reference of DO8, setting range: AI1, AI2...AI8, RS485 If set to RS485, the DO is controlled by RS485 communication, other ROP setting is disenabled	r5485
	DO8 Alarm Action Direction Setting (ACt8)	Setting the alarm output action direction, setting range: Hi, Lo Hi is for high alarm(\geq) and Lo is for low alarm($<$).	Hi
	DO8 Alarm Hysteresis Setting (HYs8)	Setting the alarm hysteresis value, setting range: 0~9999 Turn off the alarm after the display value cross over the alarm point and this setting value.	00000
	DO8 Alarm Delay Time Setting (dEL8)	Setting the alarm action delay time, setting range: 0~99 (sec) Turn on the alarm after the display value cross over the alarm point and this setting time.	00000
	Alarm Start Band Setting (Sb)	Setting the alarm start band, setting range: 0~99 The alarm function will be enabled when the display value high than this setting.	00000
	Alarm Start Band Time Setting (Sdt)	Setting the alarm start band delay time, setting range: 0~99 (sec) The alarm function will be enabled when the display value high than Sb and over this time.	00000
		*Sb and Sdt is for Lo alarm, that can avoid the wrong low alarm when the machine starting up.	

COMMUNICATION SETTING PROCEDURES

Block Charts	Display	Descriptions	Default
	DOP Communication Setting Group Procedures		
	Measuring Status	Present value for measurement.	
	System Setting Group (SYS)		
	Communication Setting Group (doP)		
	Address Setting (Addr)	Setting the address, setting range: 0~255	00000
	Baud Rate Setting (bAUd)	Setting the baud rate, setting range: 38400, 19200, 9600, 4800	19200
	Parity Setting (PARi)	Setting the parity, setting range: n.8.2, n.8.1, even, odd	n.8.2

ERROR CODE

Display	Descriptions
1.0FL	Input signal is over 120% of input range.
-1.0FL	Input signal is under -20% of input range.
AdEr	Input signal is over 180% of input range or meter error.
doFL	Input signal is over display range (99999)
-doFL	Input signal is under display range (-19999)
E-00	EEPROM reading/writing suffers the interference (about 1 million times).

**Please check that the wiring is correct at the first time, if the problem still available, please contact the dealer in your district.

ADI Modbus RTU Mode Protocol Address Map

Data size 16bit / 32bit, signed range: 8000~7fff(-32768~32767) / 80000000~7fffffff(-2147483648~2147483647)

Modbus	HEX	Name	Descriptions	Act
40001	00H	ID		R
40002	01H	ACT	Alarm action direction setting; BIT7:ACT8, BIT6:ACT7, BIT5:ACT6, BIT4:ACT5, BIT3:ACT4, BIT2:ACT3, BIT1:ACT2, BIT0:ACT1; Setting range:0000~000F(0:HI, 1:LO)	R/W
40003	02H	LOCK	Key lock setting; setting range: 0000~0001(0:NO , 1:YES)	R/W
40004	03H	BAUD	Baud rate setting; setting range: 0000~0003(0:38400 , 1:19200 , 2:9600 , 3:4800)	R/W
40005	04H	PARI	Parity setting; setting range: 0000~0003(0:n.8.2 , 1:n.8.1 , 2:even , 3:odd)	R/W
40006	05H	DSEL1	DO reference setting; setting range: 0000~0009(0:RS485 , 1:A11 , 2:A12 , 3:A13 , 4:A14 , 5:A15 , 6:A16 , 7:A17 , 8:A18)	R/W

40043	2AH	CODE	Pass code setting; setting range: 0000~4E1F(0~19999)	R/W
40044	2BH	DSPL1	Low scale of display value; setting range: FFFFB1E1~00004E1F(-19999~19999)	R/W
40045	2CH	DSPL2		
40046	2DH	DSPL3		
40047	2EH	DSPL4		
40048	2FH	DSPL5		
40049	30H	DSPL6		
40050	31H	DSPL7		
40051	32H	DSPL8		

ADI Modbus RTU Mode Protocol Address Map

Data size 16bit / 32bit, signed range: 8000~7fff(-32768~32767) / 80000000~7fffffff(-2147483648~2147483647)

Modbus	HEX	Name	Descriptions	Act
40052	33H	DSPH1	High scale of display value; setting range: FFFFB1E1~00004E1F(-19999~19999)	R/W
40053	34H	DSPH2		
40054	35H	DSPH3		
40055	36H	DSPH4		
40056	37H	DSPH5		
40057	38H	DSPH6		
40058	39H	DSPH7		
40059	3AH	DSPH8		
40060	3BH	AL1	Alarm point setting; setting range: FFFFB1E1~00004E1F(-19999~19999)	R/W
40061	3CH	AL2		
40062	3DH	AL3		
40063	3EH	AL4		
40064	3FH	AL5		
40065	40H	AL6		
40066	41H	AL7		
40067	42H	AL8		
40068	43H	DIO	DI/DO status, setting range:0000~FFFF High byte for DI: Bit7:DI8, Bit6:DI7, Bit5:DI6, Bit4:DI5, Bit3:DI4, Bit2:DI3, Bit1:DI2, Bit0:DI1; Low byte for DO: Bit7:DO8, Bit6:DO7, Bit5:DO6, Bit4:DO5, Bit3:DO4, Bit2:DO3, Bit1:DO2, Bit0:DO1;	R/W
40069	44H	AI1	Analog input display value; reading range: FFFFB1E1~00004E1F(-19999~19999)	R
40070	45H	AI2		
40071	46H	AI3		
40072	47H	AI4		
40073	48H	AI5		
40074	49H	AI6		
40075	4AH	AI7		
40076	4BH	AI8
